INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2004/012757

	Box No. i	Basis of the report
•	With regard	I to the language , this report is based on the international application in the language in which it was so otherwise indicated under this item.
	which	eport is based on translations from the original language into the following language , is the language of a translation furnished for the purposes of:
	□ pul □ inte	ernational search (under Rules 12.3 and 23.1(b)) olication of the international application (under Rule 12.4) ernational preliminary examination (under Rules 55.2 and/or 55.3)
2.	have hoor	d to the elements* of the international application, this report is based on <i>(replacement sheets which</i> furnished to the receiving Office in response to an invitation under Article 14 are referred to in this originally filed" and are not annexed to this report):
	Descriptio	n, Pages
	1-11	as originally filed
	Claims, No	!
	1-13	received on 10.08.2005 with letter of 27.07.2005
	□ a sec	uence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing
3	. □ The	amendments have resulted in the cancellation of:
		e description, pages
	□ th	e claims, Nos. e drawings, sheets/figs
	□а	ne sequence listing (specify): ny table(s) related to sequence listing (specify):
4	had not b	report has been established as if (some of) the amendments annexed to this report and listed below been made, since they have been considered to go beyond the disclosure as filed, as indicated in the ental Box (Rule 70.2(c)).
	□ tl	ne description, pages ne claims, Nos.
	□ ti	ne drawings, sheets/figs
	□a	ne sequence listing (specify): any table(s) related to sequence listing (specify):
	* If	item 4 applies, some or all of these sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2004/012757

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-13

No: Claims

Inventive step (IS) Yes: Claims 1-13

No: Claims

Industrial applicability (IA) Yes: Claims 1-13

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following document:

D4: US-A-5482642

2. The document D4 is regarded as being the closest prior art to the subject-matter of claim 1 because it also addresses the degradation problems due to the presence of heavy metal ions in detergent products. This document shows (the references in parentheses applying to this document):

a process for making a solid detergent composition by mixing part of anionic surfactant, carrier and sequestrant in a high speed mixer and adding another part of anionic surfactant, sequestrant and carrier material at another stage of the process. The subject-matter of claim 1 differs from this known D4 in that one part of anti-

oxidant/sequestrant and/or support material is introduced in the mixer at a first point of introduction, while the remainder of these components is introduced at a second point of introduction downstream from the first point of introduction.

Thus the subject-matter of claim 1 is new (Art. 33 (2) PCT).

3. The object of the present invention may be seen in to overcome the problem of malodour occurrence due to the presence of heavy metal ions in surfactants. The problem is solved by a process as disclosed in present claim 1.

The prior art does not lead the skilled person to the subject-matter of claim 1.

Therefor the subject-matter of claim 1 is inventive (Art. (3) PCT).

The same applies for dependent claims 2-13.

C7729 (C) WO (Amended 27 July 05)

- 12 -

CLAIMS

5

10

15

20

- Process for the production of powdered detergent composition with the composition comprising:
 - 1 wt % to balance of anionic surfactants
 - 0 to 25 wt %, preferably 1 to 10 wt % of fatty acid
 derivatives, in particular fatty acid soaps
 - up to 75 wt %, in particular 1 to 25 wt % of a support material
 - less than 25 wt %, preferably less than 10 wt % and in particular 1 to 5 wt % of total water (i.e. sum of free and bound water).
 - 0 to 3 wt % of perfumes
 - o to 75 wt %, preferably 0 to 50 wt % and in particular 5 to 30 wt % of builder material
 - 0.05 to 5 wt %, in particular 0.1 to 3 wt % and most preferably 0.2 to 2 wt % of a sequestrant and/or anti-oxidant, while the composition contains more than 10 ppm, in particular 10 to 1000 ppm of transition (heavy) metal ions, in particular derived from Fe or Cu
- wherein the ingredients of the detergent composition,

 comprising at least part of the total amount present in

 the whole composition of at least one of the

 ingredients selected from the group consisting of

 support material, anti-oxidant and sequestrant are

 introduced in a mixer at a first point of introduction

 and homogenised at a temperature between 10 and 160°C

 while the remainder of anti-oxidant and/or sequestrant

C7729 (C) WO (Amended 27 July 05)

and/or support material is introduced in the mixer at a second point of introduction downstream from the first point of introduction, while the mixture obtained can be sprayed dried by spraying it on the support material using a thin layer drying process.

- 2. Process according to claim 1 wherein the mixer applied is selected from the group consisting of: a scraped wall heat exchanger/mixer/drier, a high shear mixer granulator; a medium shear mixer granulator, or a low shear mixer granulator.
- 3. Process according to claims 1 or claim 2 wherein the mixer is a VRV mixer.
- 4. Process according to claims 1 to 3 wherein the VRV mixer is applied with a tip speed of 10 to 50 m s⁻¹, preferably 18-45 and most preferably 30 to 40 m.s⁻¹, and a distance between wall and blades of up to 10 mm.
- 5. Process according to claims 1 to 4 wherein the VRV mixer is used with a heater shell area of up to 32 m², an inner superficial gas velocity (countercurrent) of up to 4 m.s⁻¹, pref up to 2 m.s⁻¹ and a residence time of up to 300 sec, preferably up to 60 sec.
- 6. Process according to any preceding claim wherein the anionic surfactant is selected from salts of LAS and/or PAS.

25

C7729 (C) WO (Amended 27 July 05)

- 14 -

- 7. Process according to any preceding claim wherein the amount of anionic surfactant is 5 to 75 wt%, preferably 10 to 50 wt%.
- 5 8. Process according to any preceding claim wherein the soap is a fatty acid salt from a fatty acid with 12 to 20 C-atoms, in particular with 16 to 18 C-atoms.
- 9. Process according to any preceding claim wherein the sequestrant and or anti-oxidant is selected from the group consisting of: EDTA; STP; Citric acid; a BHT derivative such as Tinogard; or Irganox or Tetronic.
- 10. Process according to any preceding claim wherein the support is selected from the group consisting of; zeolites; Al-silicates; silicates, alkali carbonates or alkali hydrogencarbonates; cellulose derivatives; polymers or copolymers from Na-acrylate.
- 20 11. Process according to any preceding claim wherein the composition is free of an ultraviolet absorber.
- 12. Process according to any preceding claim wherein the composition also comprises up to 20 wt % of other surfactants, in particular up to 20 wt% of non-ionic and/or cationic surfactants.
- 13. Process according to any preceding claim wherein the composition has an untapped bulk density of more than 600 g/l.
